BOOK SYNOPSIS

For introductory courses in Theories of Counseling and Psychotherapy. From two of the best known authors in the counseling profession, comes a freshly-updated fourth edition of this popular text on theories of counseling and psychotherapy. This unique text examines the theories of counseling and psychotherapy through the eyes of 20 experts in the field who are experienced in the theory they discuss. Readers will find timely information and a professional perspective that makes each chapter relevant, as an expert discusses the theory and its application in the clinical setting. A consistent case study seamlessly ties together each chapter, reinforcing how theories help organize data and provide guidelines for helping professionals. Because each theory is presented using this standard format and bolstered by a running case study, students will also come away from this text with the cross-theory comparisons they need to decide on their own course of specialized study, and determine a personal perspective on counseling. diversity, a new chapter on transpersonal theory and social justice, more on feminist theory, more on integrative approaches to counseling and psychotherapy, a chapter on body-centered counseling and psychotherapy, and discussion of personal and professional identity. These new topics, in addition to an added case study that illustrates how a different theoretical set and associated interventions can influence the direction of counseling, makes this text both substantive and applied, clearly the ideal text for students who are just beginning their study of counseling and psychotherapy.

COUNSELING AND PSYCHOTHERAPY THEORIES AND INTERVENTIONS
